20-850 King St. W, Oshawa

## THE IDEA

An evening to stimulate thinking about succession, the next generation, and different ways sisters and brothers (as well as other family members and allies) might begin to have conversations that will inform the future.

## THE PRESENTER

Libby Ellis will share the story of her family, the steps they have walked with her brother over the past years, and changes in family roles and generations along the way. Together they have worked to think outside of the box so that her brother has maximum authority to define his needs and to direct the use of resources towards his own good life in community while his family continues to be there for and with him.
